

LINER COMPRESSOR 3.0

Securely and Tightly Seal CIPP Liners

The upgraded design of the new Picote Liner Compressor 3.0 tightly clamps the end of the liner to prevent it collapsing from loss of pressure while you replace the inversion equipment with a Curing Cap or Picote Cannon Fast Cap.

Simply set the Tightening Cable around the liner, lock it into position and tighten. After the Curing Cap and air pressure are attached, just loosen the cable and remove.

USES, BENEFITS, AND PRODUCTS

Features

- Use to clamp DN50-150 (2-6") liners.
- Securely and tightly clamps and seals the liner.
- Tighten the cable conveniently with a battery operated drill or a manual tool (10mm connection).
- Set the Tightening Cable around the liner, position and tighten. After the Curing Cap and air pressure are attached, just loosen the cable and remove.

Benefits

- Lightweight and easy to operate.
- Securely holds the liner with no air leakage.
- Tightening Cable is easily replaced when needed.

Technical Specifications & Products

Category	Measurement
Size	151x442x45mm (5.9x17.4x1.7")
Weight	1.9kg (4.2 lbs)
Part Number	Description
