

PICOTE SMALL GRABBER

Avoid Digging Up Pipes to Retrieve Tools or Foreign Objects

Quickly retrieve lost tools, or foreign objects blocking DN50-75 (2-3") pipes, avoiding the time and cost of digging and demolition.

There are two customized Jaw designs and two Jaw sizes for each design available. The Jaws can be changed according to the job at hand.

The Small Grabber is easy to operate and is built with simple mechanics. Use a CCTV camera to locate the desired location and simply push it into position. Then, simply turn the handle clockwise to tighten the jaw until you have a solid grip on the object to pull it out and retrieve it.

USES AND BENEFITS

- Two lengths: 5 & 10m (16 & 32ft).
- Two models of Jaw sets for different uses: Model 1 (Paw) & Model 2 (Claw).
- Two packages are available:
- **Value Package:** DN50 & 70 (2 & 3") Model 1 Jaws (Paw version - 2 jaws total).
- **Extra Package** DN50 & 70 (2 & 3") Model 1 and Model 2 Jaws (Paw and Claw versions - 4 jaws total).
- Comes assembled with DN50 (2") Model 1 Jaw (Paw).
- No need an air compressor.
- Navigates 90° bends.

Pipe Diameters	DN50 (2") and DN70 (3")
Lengths	5m (16')
	10m (32')
Extensions	Not available

Recommendations:

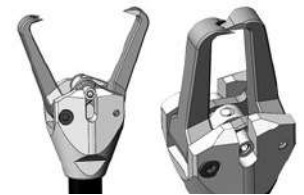

- Always use a CCTV camera when working with the Grabber.

Jaw Models and Uses:

- The Small Grabber comes with the Model 1 Jaw (Paw) as standard. The DN50 (2") head is pre-attached. The Paw is perfect for grabbing most items with a larger surface area where you cannot get the jaw all the way around the object. Also ideal for objects with smoother surfaces which can be harder to grab.
- The Model 2 Jaws (Claws) are sold separately or as part of the **Extra** package. The jaws of the Claw overlap so that they can fully encompass a smaller object or a smaller part of an object (for example a chain link).

Model 1 Jaw (Paw)

Model 2 Jaw (Claw)
